IT’S A PLAN: COLLEGE CHECKLISTS

First year college students may need extra support as they transition from high school. In order to support college students, Oregon GEAR UP created a series of comprehensive checklists for educators, students and families that address key behaviors and action items that will help students in this new stage of their life.

INSTRUCTIONS

1. **Get a team.** Whether you work at a secondary school or a college, it’s important to provide a network of support. Include administrators, teachers, parents and students to help share these messages.

2. **Make a communications plan.** Determine when and how you will share information to students and families; consider more than one method. Make sure you have students and families cell phone numbers, e-mails or mailing addresses if you plan to communicate in those ways.

3. **Download and print** the checklists and any additional resources here: oregongoestocollege.org/itsaplan/educators/downloads
